2013 | Awards for art

Since I was a young child, art has always meant something quite different to me. I have always been intrigued by how people portray the world in which they actually live. I made the decision to do this after realizing that I could translate my ideas from my head to paper.

2019 | Math Camp

I had a truly fantastic time. Excellent planning, excellent lecturers—without problems. The camp was a great place for me to meet lots of new people and talk about all kinds of things. In less than a minute, I was able to solve the Rubik's cube, which was one of the camp's most unforgettable experiences.

2017 | Tennis Tournament

2016 | Basketball 3x3 Tournament

Medals and trophies

In addition to the aforementioned sporting occasions, I should also point out that the volleyball team from my high school and I won two medals. I won first place in darts in addition to volleyball, so I was able to take the cup and medal home with me.
